Hi Liz and Dan,

I have added the historic USGS sample locations and the proposed Draft EPA sampling locations for Mineral Creek to the Upper Animas viewer. You can find the layers in the Sampling (2015) group. Please refresh your browser or use an incognito/privacy tab and let me know if you have any difficulties.

<https://r8.ercloud.org/Animas/>

Thanks,

-Ryan

Let me know if you can't find the USGS data. We have a contact with BLM who has a copy. Do you have a FTP site available that they could transfer the files to you?

Hi Liz,

I will add this data to the viewer after taking a look at it and will notify you when it is done. I do not have a copy of the USGS CD but will look around to see if I can find anything on our drives. I have fun into USGS data in the past, just unsure if it is different from what is on the CD.

Enjoy Durango,

-Ryan

Hi Ryan,

You just got off the phone with Dan. I would like to align the data points within the KMZ file the points within the USGS 1651 report in the Mineral Creek drainage. We need to align them to determine sample location ID and then I will work to determine ownership of each location. Here are the things that I need help with:

- 1) Add the attached KMZ file in the Upper Animas Viewer.
- 2) Do you have a copy of the CD that came with the USGS 1651 report, which should have GIS data layers with the sampling locations? (I believe Rob Parker used this data to determine the locations in the KMZ file)
- 3) Add the data from the USGS 1651 CD in the viewer for Mineral Creek sampling locations
- 4) Create a draft spreadsheet with the sampling locations, this will be used for the QAPP and for me to track ownership identification.

At this point, can you let me know when the view has been updated and I can start on some of the locations to try and identify ownership.

- 5) Compare the locations in the KMZ file and the USGS 1651 sampling locations to verify they are the same locations.

Please let me know if you have questions. My cell phone number is Personal Phone/Ex. 6 I am sitting next to Dan in Durango at incident command.

Liz

Deliberative Process/Ex. 5

Unfortunately, I will be out of the office Thursday and Friday this week and Monday morning and Tuesday next week, which is why I wanted to send this now versus even later today. Please let me know if you have questions.

Thanks everyone,

Rob

Subject: RE: Access for MC

Thanks Liz – I spoke with Martin H yesterday afternoon and he gave me the green light to reach out to BLM and others in order to gather information regarding key sources in the creek. I called Brent Lewis with BLM yesterday but have not heard back yet.

I agree that the longer lead time we have the better, so we'll work as quick as we can to identify potential sampling locations.

Thanks,

Rob

Hi Rob,

I wanted to check in and see if there has been a decision on sampling in Mineral Creek and what locations have been proposed. I can assist with identifying ownership and calling owners for consent for access, but it is a process and the longer lead time the better.

Thanks,

Liz

effort. I would recommend reaching out to the following folks in determining ownership as they

have experience in identifying ownership in the area and in a number of cases have current records for many of the mine locations that we would be interested in. Shawn should be able to assist you with finding phone #s for the owners as a 1st contact.

Kirsten Brown, DRMS in Durango - (970) 903-7889 email: kirsten.brown@state.co.us
DRMS has a lot of current ownership information on these sites which could save valuable time.

Brent Lewis, BLM – 303-239-3711 Email: Brent_Lewis@blm.gov Brent will know whether or not Lisa Richardson (who lives in Silverton) is back; Nonresponsive Discussion of Personal Matters/Ex. 6 and could help with identifying ownership. Brent will also know who at USFS in Durango can assist with identifying their ownership in the MC watershed.

If Liz Fagan can spare any time while she is in Durango at Area Command, then she may be able to assist. if you have any questions this week, let me know.
